Re: No Further Action
Facility

Dear :

On February 14, 1998, our office received a request for no further action for your facility at

The report indicates that the highest contaminant levels remaining on the property are at 113 parts per billion (ppb) benzene in groundwater. The analytical results show a leveling off of contaminant concentration for the eighth consecutive quarter. Although the results exceed the regulatory requirements, IDEM agrees that they pose no significant threat to human health or the environment. Based on the information submitted, no further action is required at this time.

If you have any questions concerning this matter, please contact Lynette Schrows at (317) 308-3099.

Sincerely,

Craig Schroer, Chief
Leaking Underground Storage Tank Section
Office of Environmental Response
